Zero-Installation SaaS Platform Architecture

ZunoTales is a 100% cloud-hosted Software-as-a-Service (SaaS) platform. We host, maintain, and secure the application entirely on our infrastructure. Schools and institutions are NOT required to host any files, manage servers, or install local software.

Key Features:

- Access Model: Teachers, administrators, and students access the platform directly via <https://www.zunotales.com> using any modern web browser.
- Classroom Readiness: Requires only a multimedia-ready output device (Interactive Smartboard, Projector, or Screen) with a stable internet connection.
- Zero Maintenance: We manage all updates, backups, and security patches automatically. No local IT overhead or app deployments are needed.
- Whitelisting: Schools only need to ensure "*.zunotales.com" is whitelisted on their campus firewalls or web filtering systems.
- Hardware Agnostic: Fully compatible with school-issued Chromebooks, iPads, and standard desktop environments without specialized plugins.
